FOR IMMEDIATE RELEASE

December 2018

Louisville, KY – The Standard Group, a preferred independent designer and manufacturer of innovative paperboard packaging and high graphic folding cartons, announces the achievement of recertification for the ISO 9001:2015 Quality Management Systems Standard effective November 17, 2018. This is the company's second year operating under this new standard as they previously had maintained ISO 9001:2008 certification since November of 2008. British Standards Institution (BSI) partnered with the company and performed the recertification audit. The ISO 9001:2015 certification is valid through November of 2020 with annual recertification audits.

International Organization for Standardization (ISO) 9001:2015 is the most updated standard of its kind and focuses on quality management systems that support a greater emphasis on business performance and customer satisfaction. This standard requires a strong focus on risk-based thinking and accountability in all organizational processes that help improve communications, efficiency and the implementation of continuous improvement.
